

Technical Information

Micropilot FMR20

Free space radar

Level measurement for liquids

Application

- Ingress protection: IP66/68 / NEMA 4X/6P
- Measuring range: up to 20 m (66 ft)
- Process temperature: -40 to 80 °C (-40 to 176 °F)
- Process pressure: -1 to 3 bar (-14 to 43 psi)
- Accuracy: up to ± 2 mm (0.08 in)
- International explosion protection certificates

Your benefits

- Level measurement for liquids in storage tanks, open basins, pump shafts and canal systems
- Radar measuring device with *Bluetooth*® wireless technology and HART communication
- Simple, safe and secure wireless remote access – ideal for installation in hazardous areas or places difficult to reach
- Commissioning, operation and maintenance via free iOS / Android app SmartBlue – saves time and reduces costs
- Full PVDF body – for a long sensor lifetime
- Hermetically sealed wiring and fully potted electronics – eliminates water ingress and allows operation under harsh environmental conditions
- Most compact radar due to unique radar chip design – fits in limited space installations
- Best price-performance-ratio radar

Product life cycle

Engineering

- Proven radar measuring technology
 - Level- and open channel flow measurement for Ex and non-Ex
 - Indication of over-flooding situation
 - Wide range of installation possibilities and accessories
 - Highest degree of ingress protection
 - 2D / 3D drawings
 - Spec Sheet Producer
 - Applicator Selection tool for the selection of the perfect measurement solution
-  Device not compatible with transmitters and sensors of ultrasonic measurement technology (e.g. Prosonic FMU9x, FDU9x)

Procurement

- Best price-performance-ratio radar
- Global availability
- Order code includes variety of mounting accessories and remote HART indicator RIA15

Installation

- Rear- and front side thread for flexible installation
- Slip- on flange for nozzle installation
- Complete measuring point: Including mounting accessory, RIA15 and flooding protection tube

Commissioning

- Easy and fast setup via SmartBlue (app) and DeviceCare / FieldCare or RIA15
- No additional tools or adapters required
- Local languages (up to 15)

Operation

- Continuous self-monitoring
- Diagnosis information acc. NAMUR NE107 with clear text messages remedy directives
- Signal curve via SmartBlue (app) and DeviceCare / FieldCare
- Encrypted single point-to-point data transmission (Fraunhofer-Institut, third party, tested) and password-protected communication via *Bluetooth*[®] wireless technology

Maintenance

- No maintenance required
- Technical experts on-call around the global

Retirement

- Environmentally responsible recycling concepts
- RoHS compliance (Restriction of certain hazardous substances), lead-free soldering of electronic components

Measuring principle

The Micropilot is a "downward-looking" measuring system, operating based on the time-of-flight method (ToF). It measures the distance from the reference point **R** to the product surface. Radar impulses are emitted by an antenna, reflected off the product surface and received again by the radar system.

1 Setup parameters of the Micropilot

- E* Empty calibration (= zero)
- F* Full calibration (= span)
- D* Measured distance
- L* Level ($L = E - D$)
- Q* Flow rate at measuring weirs or channels (calculated from the level using linearization)
- R* Reference point

Input

The reflected radar impulses are received by the antenna and transmitted into the electronics. A microprocessor evaluates the signal and identifies the level echo caused by the reflection of the radar impulse at the product surface. This clear signal detection system benefits from over 30 years' experience with time-of-flight procedures.

The distance **D** to the product surface is proportional to the time of flight **t** of the impulse:

$$D = c \cdot t/2,$$

where **c** is the speed of light.

Based on the known empty distance **E**, the level **L** is calculated:

$$L = E - D$$

Output

The Micropilot is adjusted by entering the empty distance **E** (= zero point) and the full distance **F** (= span).

- Current output: 4 to 20 mA
- Digital output (HART, SmartBlue): 0 to 10 m (0 to 33 ft) or 0 to 20 m (0 to 66 ft) depending on antenna version

Input

Measured variable The measured variable is the distance between the reference point and the product surface.
The level is calculated based on **E**, the empty distance entered.

Measuring range **Maximum measuring range**

Device	Maximum measuring range
FMR20 with 40 mm (1.5 in) antenna	10 m (33 ft)
FMR20 with 80 mm (3 in) antenna	20 m (66 ft)

Requirements of the installation

- recommended tank height > 1.5 m (5 ft) for media with low DC value
- Open channel minimum width 0.5 m (1.6 ft)
- Calm surfaces
- No agitators
- No buildup
- Relative dielectric constant $\epsilon_r > 4$

Usable measuring range

The usable measuring range depends on the antenna size, the medium's reflective properties, the installation position and any possible interference reflections.

The following table describes the media groups.

Media groups

ϵ_r	Example
4 to 10	e.g. concentrated acid, organic solvents, ester, aniline, alcohol, acetone.
> 10	conductive liquids, aqueous solutions, diluted acids and bases

Reduction of the max. possible measuring range by:

- Media with bad reflective properties (= low ϵ_r value)
- Formation of buildup, particularly of moist products
- Strong condensation
- Foam generation
- Freezing of sensor

Operating frequency K-band (~ 26 GHz)

Transmission power

Distance	Mean power density in the direction of the beam
1 m (3.3 ft)	< 12 nW/cm ²
5 m (16 ft)	< 0.4 nW/cm ²

Output

Output signal	<p>4 to 20 mA</p> <p>An 4 to 20 mA interface is used for measured value output and to power to the device.</p>

Electrical connection

Cable assignment

A0028954

2 Cable assignment

- 1 Plus, brown wire
- 2 Minus, blue wire

Supply voltage

An external power supply is necessary.

Terminal voltage U at device	Maximum load R, depending on supply voltage U_0 of power supply unit
10.5 to 30 V _{DC} 2-wire	<p>The graph plots Maximum load R [Ω] on the y-axis (0 to 500) against supply voltage U_0 [V] on the x-axis (10 to 30). The load is 0 Ω for U_0 between 10 and 10.5 V. It increases linearly to 500 Ω at $U_0 = 21.75$ V. For U_0 between 21.75 V and 30 V, the load remains constant at 500 Ω.</p>

A0029226

Potential equalization

No special measures for potential equalization are required.

In the case of a device for the hazardous area, please comply with the safety instructions in the separate "Safety Instructions" (XA, ZD) document.

i Various power supply units can be ordered from Endress+Hauser: see "Accessories" section → 51

i Battery operation

The sensor's *Bluetooth*[®] wireless technology communication can be disabled to increase the operating life of the battery.

Power consumption

Maximum input power: 675 mW

Current consumption

- maximum input current: <25 mA
- Maximum start-up current: 3.6 mA

Starting time

First stable measured value after 20 s (with supply voltage = 24 V_{DC})

Power supply failure The configuration remains stored in the sensor.

Connection **FMR20, 4 to 20 mA HART**

	Circuit diagram / Description
<p>FMR20 connection with HART communication, voltage source and 4 to 20 mA display</p>	<div style="text-align: center;">  </div> <p style="text-align: right; font-size: small;">A0028908</p> <p>  3 <i>FMR20 block diagram, HART</i> 1 <i>Micropilot FMR20</i> 2 <i>HART resistance</i> 3 <i>Power supply</i> </p>

 The HART communication resistor of 250 Ω in the signal line is always necessary in the case of a low-impedance power supply.

The voltage drop to be taken into account is:
Max. 6 V with 250 Ω communication resistor

FMR20 with RIA15 (incl. option for basic configuration FMR20)

i The RIA15 remote display can be ordered together with the device.

Product structure, feature 620 "Accessory enclosed":

- Option R4 "Remote display RIA15 non-hazardous area, field housing"
- Option R5 "Remote display RIA15 with explosion protection approval, field housing"

b Alternatively available as an accessory, for details see Technical Information TI01043K and Operating Instructions BA01170K

i The RIA15 process display unit is loop-powered and does not require any external power supply.

The voltage drop to be taken into account is:

- ≤ 1 V in the standard version with 4 to 20 mA communication
- ≤ 1.9 V with HART communication
- additional 2.9 V if display light is used

	Circuit diagram / Description
FMR20 connection, HART communication and RIA15 without backlight	 <p>4 FMR20 block diagram, HART with RIA15 process display unit without light</p> <p>1 Micropilot FMR20 2 Power supply 3 HART resistance</p> <p style="text-align: right;"><small>A0019567</small></p>

FMR20, RIA15 with installed HART communication resistor module

 The HART communication module for installation in the RIA15 can be ordered together with the device.

Product structure, feature 620 "Accessory enclosed":

Option R6 "HART communication resistor hazardous / non-hazardous area"

The voltage drop to be taken into account is:

Max. 7 V

 Alternatively available as an accessory, for details see Technical Information TI01043K and Operating Instructions BA01170K

	Circuit diagram / Description
<p>FMR20 connection and RIA15 without backlight</p>	 <p>6 FMR20 block diagram, RIA15 without light, HART communication resistor module</p> <p>1 HART communication resistor module 2 Micropilot FMR20 3 Power supply</p> <p style="text-align: right;">A0020839</p>
<p>FMR20 connection and RIA15 with backlight</p>	 <p>7 FMR20 block diagram, RIA15 with light, HART communication resistor module</p> <p>1 HART communication resistor module 2 Micropilot FMR20 3 Power supply</p> <p style="text-align: right;">A0020840</p>

Cable specification

Unshielded cable, 2 × 0.75 mm²

- UV- and weather-resistant acc. ISO 4892-2
- Flame retardant acc. IEC 60332-1-2

As per IEC/EN 60079-11 section 10.9, the cable is designed for a tensile strength of 30 N (6.74 lbf) (over a period of 1 h).

The FMR20 is supplied with 5 m (16 ft) cable length as standard. Optional lengths are available with 10 m (33 ft) and 20 m (66 ft).

Lengths can be selected by the user up to an overall length of 300 m (980 ft) and are available by the meter (ordering option "8") or foot (ordering option "A").

Overvoltage protection

The device is equipped with integrated overvoltage protection.

Performance characteristics

Reference operating conditions

- Temperature = +24 °C (+75 °F) ±5 °C (±9 °F)
- Pressure = 960 mbar abs. (14 psia) ±100 mbar (±1.45 psi)
- Humidity = 60 % ±15 %
- Reflector: metal plate with diameter ≥ 1 m (40 in)
- No major interference reflections inside the signal beam

Maximum measured error

Typical data under reference operating conditions: DIN EN 61298-2, percentage values in relation to the span.

Device	Value	Output	
		digital ¹⁾	analog ²⁾
FMR20 40 mm (1.5 in)Antenna	Sum of non-linearity, non-repeatability and hysteresis	±2 mm (±0.08 in)	±±0.02 %
	Offset/Zero	±4 mm (±0.16 in)	±0.03 %
FMR20 80 mm (3 in)Antenna	Sum of non-linearity, non-repeatability and hysteresis	±2 mm (±0.08 in)	±0.02 %
	Offset/Zero	±4 mm (±0.16 in)	±0.03 %

1) HART, SmartBlue (app)

2) Only relevant for 4-20mA current output; add error of the analog value to the digital value

Differing values in near-range applications

8 Maximum measured error in near-range applications; values for standard version

Δ Maximum measured error

R Reference point of the distance measurement

D Distance from reference point of antenna

Measured value resolution

Dead band as per EN61298-2:

- Digital: 1 mm (0.04 in)
- Analog: 4 μ A

Response time

The response time can be configured. The following step response times (as per DIN EN 61298-2)¹⁾ apply if the damping is switched off:

Tank height	Sampling rate	Response time
<20 m (66 ft)	1 s ⁻¹	<3 s

Influence of ambient temperature

The measurements are carried out in accordance with EN 61298-3.

- Digital (HART, *Bluetooth*[®] wireless technology):
Standard version: average $T_K = \pm 3 \text{ mm } (\pm 0.12 \text{ in})/10 \text{ K}$
- Analog (current output):
 - Zero point (4 mA): average $T_K = 0.02 \text{ } \%/10 \text{ K}$
 - Span (20 mA): average $T_K = 0.05 \text{ } \%/10 \text{ K}$

1) According to DIN EN 61298-2 the step response time is the time which passes after a sudden change of the input signal until the output signal assumes 90% of the steady-state value for the first time.

Installation

Installation conditions

Installation types

A0030605

- 9 Wall, ceiling or nozzle installation
- A Wall or ceiling mount, adjustable
 - B Mounted at front thread
 - C Mounted at rear thread
 - D Ceiling installation with counter nut (included in delivery)

i Caution!

- The sensor cables are not designed as supporting cables. Do not use as a suspension wire.
- In the free-field, a vertically downward orientation must be ensured at all times

Nozzle installation

The antenna should be just out of the nozzle for optimum measurement. The interior of the nozzle must be smooth and may not contain any edges or welded joints. The edge of the nozzle should be rounded if possible. The maximum nozzle length **L** depends on the nozzle diameter **D**. Please note the specified limits for the diameter and length of the nozzle.

A0028413

- 10 FMR20 nozzle installation
- A FMR20 80 mm (3 in) antenna
 - B FMR20 40 mm (1.5 in) antenna

	80 mm (3 in) antenna, inside nozzle	80 mm (3 in) antenna, outside nozzle	40 mm (1.5 in) antenna, outside nozzle	40 mm (1.5 in) antenna, inside nozzle
D	min. 120 mm (4.72 in)	min. 80 mm (3 in)	min. 40 mm (1.5 in)	min. 80 mm (3 in)
L	max. 205 mm (8.07 in) + D × 4,5	max. D × 4,5	max. D × 1,5	max. 140 mm (5.5 in) + D × 1,5

Orientation

11 Tank installation position

- If possible install the sensor so that its lower edge projects into the vessel.
- Recommended distance **A** wall - nozzle outer edge: ~ 1/6 of the tank diameter **D**. However, the device must not under any circumstances be mounted closer than 15 cm (5.91 in) to the tank wall.
- Do not mount the sensor in the center of the tank.
- Avoid measurements through the filling curtain.
- Avoid equipment such as limit switches, temperature sensors, baffles, heating coils etc.
- Several devices can be operated in a single tank without impacting on each other.
- No signals are analyzed within the Blocking distance (BD). It can therefore be used to suppress interference signals (e.g. the effects of condensate) close to the antenna.
An automatic Blocking distance of at least 0.1 m (0.33 ft) is configured as factory setting. However, this can be overwritten manually (0 m (0 ft) is also permitted).

Automatic calculation:

Blocking distance = Empty calibration - Full calibration - 0.2 m (0.656 ft).

Each time a new entry is made in the **Empty calibration** parameter or **Full calibration** parameter, the **Blocking distance** parameter is recalculated automatically using this formula.

If the result of the calculation is a value <0.1 m (0.33 ft), the Blocking distance of 0.1 m (0.33 ft) continues to be used.

Alignment

- Align the antenna vertically to the product surface.
- Align the eyelet with the mounting eye as well as possible towards the tank wall.

A0028927

12 Sensor alignment when mounting in tank

Beam angle

A0033201

13 Relationship between beam angle α , distance D and beam diameter W

The beam angle is defined as the angle α , at which the power density of the radar waves reaches half the value of the maximum power density (3dB width). Microwaves are also emitted outside the signal beam and can be reflected off interfering installations.

Beam diameter W as a function of beam angle α and distance D .

FMR20				
Antenna size	40 mm (1.5 in)	40 mm (1.5 in) with accessory "flooding protection tube"	80 mm (3 in)	80 mm (3 in) with accessory "flooding protection tube"
Beam angle α	30°	12°	12°	
Distance (D)	Beam diameter W			
3 m (9.8 ft)	1.61 m (5.28 ft)	0.63 m (2.07 ft)	0.63 m (2.1 ft)	
5 m (16.4 ft)	2.68 m (8.79 ft)	1.51 m (4.95 ft)	1.05 m (3.45 ft)	
10 m (33 ft)	5.36 m (17.59 ft)	2.10 m (6.90 ft)	2.1 m (6.9 ft)	
15 m (49 ft)	-	-	3.15 m (10.34 ft)	
20 m (66 ft)	-	-	4.2 m (13.79 ft)	

Measurement in plastic vessels

If the outer wall of the vessel is made of a non-conductive material (e.g. GFR) microwaves can also be reflected off interfering installations outside of the vessel (e.g. metallic pipes (1), ladders (2), grates (3), ...). Therefore there should be no such interfering installations in the signal beam. For more information, please contact Endress+Hauser.

A0029540

14 Measurement in a plastic vessel

Weather protection cover

For outdoor use, a weather protection cover is recommended.

A0031277

15 Weather protection cover, e.g. with 40 mm (1.5") antenna

i The sensor is not completely covered in the case of the 40 mm (1.5 in) antenna or the 80 mm (3 in) antenna.

The weather protection cover is available as an accessory. → 38

Free-field measurement with flooding protection tube

The flooding protection tube guarantees a definitive analysis of the maximum level even in the event that the sensor is completely flooded.

In free-field installations and / or in applications where there is a risk of flooding, the flooding protection tube must be used.

A0031093

16 Function of flooding protection tube

- 1 Air pocket
- 2 O-ring (EPDM) seal
- 3 Blocking distance
- 4 Max. Level

i Flooding protection tube 40 mm (1.5 in) Antenna, metallized PBT-PC:

For use with devices in product structure, feature 100 "Process connection front", option WFE "Thread ISO228 G1-1/2".

The flooding protection tube can be ordered with the device. Product structure, feature 620 "Accessory enclosed", option R7 "Flooding protection tube, metallized PBT-PC suitable for 40 mm (1.5 in) antenna with G1-1/2" process connection on front".

Alternatively available as an accessory; order number 71325090.

Flooding protection tube 80 mm (3 in) Antenna, metallized PBT-PC:

For use with devices in product structure, feature 100 "Process connection on front", option XRO "Customer mounting device without flange".

The flooding protection tube can be ordered with the device. Product structure, feature 620 "Accessory enclosed", option R8 "Flooding protection tube, metallized PBT-PC suitable for 80 mm (3 in) antenna".

Alternatively available as an accessory; order number 71327051.

Installation with mounting bracket, adjustable

A0030606

17 Installation with mounting bracket, adjustable

- Wall or ceiling installation is possible.
- Using the mounting bracket, position the antenna so that it is perpendicular to the product surface.

NOTICE

There is no conductive connection between the mounting bracket and transmitter housing.
Risk of electrostatic charge.

- ▶ Integrate the mounting bracket in the local potential equalization system.

i The mounting bracket is available as an accessory. → 38

Cantilever installation, with pivot

A0028412

18 Cantilever installation, with pivot

A Installation with cantilever and wall bracket

B Installation with cantilever and mounting frame

C The cantilever can be turned (e.g. in order to position the sensor over the center of the channel, for example)

i The cantilever, wall bracket and mounting frame are available as accessories. → 38

Environment

Ambient temperature range	<p>Measuring device: -40 to +80 °C (-40 to +176 °F)</p> <p> It may not be possible to use the Bluetooth connection at ambient temperatures > 60 °C (140 °F).</p> <p>Outdoor operation in strong sunlight:</p> <ul style="list-style-type: none"> ■ Mount the device in the shade. ■ Avoid direct sunlight, especially in warmer climatic regions. ■ Use a weather protection cover →  38.
Storage temperature	-40 to +80 °C (-40 to +176 °F)
Climate class	DIN EN 60068-2-38 (test Z/AD)
Installation height as per IEC 61010-1 Ed.3	Generally up to 2 000 m (6 600 ft) above sea level.
Degree of protection	<p>Tested acc. to:</p> <ul style="list-style-type: none"> - IP66, NEMA 4X - IP68, NEMA 6P (24 h at 1.83 m (6.00 ft) under water)
Vibration resistance	DIN EN 60068-2-64 / IEC 60068-2-64: 20 to 2 000 Hz, 1 (m/s ²)/Hz
Electromagnetic compatibility (EMC)	Electromagnetic compatibility in accordance with all of the relevant requirements outlined in the EN 61000 series and NAMUR Recommendation EMC (NE 21). For details, please refer to the Declaration of Conformity ²⁾

27 Dimensions 80 mm (3 in) antenna with slip-on flange 6"/DN150, engineering unit: mm (in)

Applies to the following device versions

■ **Feature 095 "Process connection rear side"**

- VCE: Thread ASME MNPT1; PVDF; FNPT 1/2" conduit connection
- WDE: Thread G1 ISO228; PVDF; cable gland

■ **Feature 100 "Process connection front side"**

- RSF: UNI slip-on flange 6"/DN150/150; PP, suitable for 6" 150 lbs/DN150 PN16/10K 150

Counter nut for process connection rear side

A0028419

28 Dimensions of counter nut for process connection rear side, engineering unit: mm (in)

1 Seal

- The counter nut with seal (EPDM) is included in the scope of supply.
- Material: PA6.6

Weight	Micropilot	Weight (incl. 5 m (16.4 ft) cable)
	FMR20, 40 mm (1.5 in) antenna	Approx. 2.5 kg (5.5 lb)
FMR20, 80 mm (3 in) antenna	Approx. 2.8 kg (6.2 lb)	

Materials

A002B416

29 FMR20 materials

- A 40 mm (1.5 in) antenna
- B 80 mm (3 in) antenna

Item	Component part	Material
1	Sensor housing	PVDF
2	Seal	EPDM
3	Process connection rear side	PVDF
4	Cable gland	PA
5	Conduit connection adapter	CuZn, nickel-plated
6	O-ring	EPDM
7	Counter nut	PA6.6
8	Design ring	PBT PC
9	Process connection front side	PVDF

Connecting cable

Available cable length: 5 to 300 m (16 to 980 ft)

Material : PVC

Operability

Operating concept

- 4 to 20 mA, HART
- Menu guidance with brief explanations of the individual parameter functions in the operating tool
- Optional: SmartBlue (app) via Bluetooth® wireless technology

Via Bluetooth® wireless technology

A0028895

30 Possibilities for remote operation via Bluetooth® wireless technology

- 1 Transmitter power supply unit
- 2 Smartphone / tablet with SmartBlue (app)
- 3 Transmitter with Bluetooth® wireless technology

Via HART protocol

A0028894

31 Options for remote operation via HART protocol

- 1 PLC (programmable logic controller)
- 2 Transmitter power supply unit, e.g. RN221N (with communication resistor)
- 3 Connection for Commubox FXA195 and Field Communicator 375, 475
- 4 RIA15 loop-powered process display unit
- 5 Field Communicator 475
- 6 Computer with operating tool (e.g. FieldCare, DeviceCare, AMS Device Manager, SIMATIC PDM)
- 7 Commubox FXA195 (USB)
- 8 Field Xpert SFX350/SFX370
- 9 VIATOR modem with Bluetooth® wireless technology
- 10 Smartphone / tablet with SmartBlue (app)
- 11 Transmitter with Bluetooth® wireless technology

Certificates and approvals

 Availability of approvals and certificates can be called up daily via the product configurator.
→  37

CE mark The measuring system meets the legal requirements of the applicable EC guidelines. These are listed in the corresponding EC Declaration of Conformity together with the standards applied.
Endress+Hauser confirms successful testing of the device by affixing to it the CE mark.

RoHS The measuring system complies with the substance restrictions of the Restriction on Hazardous Substances Directive 2011/65/EU (RoHS 2).

EAC conformity The measuring system meets the legal requirements of the applicable EAC guidelines. These are listed in the corresponding EAC Declaration of Conformity together with the standards applied.
Endress+Hauser confirms successful testing of the device by affixing to it the EAC mark.

RCM-Tick marking The supplied product or measuring system meets the ACMA (Australian Communications and Media Authority) requirements for network integrity, interoperability, performance characteristics as well as health and safety regulations. Here, especially the regulatory arrangements for electromagnetic compatibility are met. The products are labelled with the RCM-Tick marking on the name plate.

A0029561

Ex approval

- Non-hazardous area
- ATEX II 1 G Ex ia IIC T4 Ga
- ATEX II 1/2 G Ex ia IIC T4 Ga/Gb
- CSA C/US General Purpose
- CSA C/US IS C.I Div.1 Gr.A-D, AEx ia / Ex ia T4
- EAC Ex ia IIC T4 Ga/Gb

- INMETRO Ex ia IIC T4 Ga/Gb³⁾
- NEPSI Ex ia IIC T4 Ga/Gb³⁾
- THS Ex ia IIC T4³⁾

Additional safety instructions must be followed for use in hazardous areas. Please refer to the separate "Safety Instructions" (XA) document included in the delivery. Reference to the applicable XA can be found on the nameplate.

 Details on the available certificates and associated XAs can be found in the **Additional documentation** section under **Safety instructions (XA)**: →  52.

Explosion-protected smartphones and tablets Only mobile end devices with Ex approval may be used in hazardous areas.

Pressure equipment with allowable pressure ≤ 200 bar (2 900 psi) Pressure instruments with a flange and threaded boss that do not have a pressurized housing do not fall within the scope of the Pressure Equipment Directive, irrespective of the maximum allowable pressure.

Reasons:

According to Article 2, point 5 of EU Directive 2014/68/EU, pressure accessories are defined as "devices with an operational function and having pressure-bearing housings".

If a pressure instrument does not have a pressure-bearing housing (no identifiable pressure chamber of its own), there is no pressure accessory present within the meaning of the Directive.

3) Under development at time of going to press

Note:

A partial examination shall be performed for pressure instruments that are part of safety equipment for the protection of a pipe or vessel from exceeding allowable limits (equipment with safety function in accordance with Pressure Equipment Directive 2014/68/EU, Article 2, point 4).

EN 302729-1/2 radio standard

The Micropilot FMR20 devices comply with the LPR (Level Probing Radar) radio standard EN 302729-1/2. The devices are approved for unrestricted use inside and outside of closed vessels in countries of the EU and EFTA. that have implemented this standard.

The following countries are those that have currently implemented the directive:

Belgium, Bulgaria, Germany, Denmark, Estonia, France, Greece, UK, Ireland, Iceland, Italy, Liechtenstein, Lithuania, Latvia, Malta, The Netherlands, Norway, Austria, Poland, Portugal, Romania, Sweden, Switzerland, Slovakia, Spain, Czech Republic and Cyprus.

Implementation is still underway in all of the countries not listed.

Please note the following for operation of the devices outside of closed vessels:

1. The device must be mounted in accordance with the instructions in the "Installation" section. →  21
2. Installation must be carried out by properly trained, expert staff.
3. The device antenna must be installed in a fixed location pointing vertically downwards.
4. The installation site must be located at a distance of 4 km from the astronomy stations listed below or otherwise approval must be provided by the relevant authority. If the device is installed at a distance of 4 to 40 km from one of the listed stations, it must not be installed at a height of more than 15 m (49 ft) above the ground.

Astronomy stations

Country	Name of the station	Latitude	Longitude
Germany	Effelsberg	50°31'32" North	06°53'00" East
Finland	Metsähovi	60°13'04" North	24°23'37" East
	Tuorla	60°24'56" North	24°26'31" East
France	Plateau de Bure	44°38'01" North	05°54'26" East
	Floirac	44°50'10" North	00°31'37" West

Spain	Yebes	40°31'27" North	03°05'22" West

Country	Name of the station	Latitude	Longitude
	Robledo	40°25'38" North	04°14'57" West
Hungary	Penc	47°47'22" North	19°16'53" East

 As a general rule, the requirements outlined in EN 302729-1/2 must be observed.

FCC / Industry Canada

This device complies with Part 15 of the FCC Rules [and with Industry Canada licence-exempt RSS standard(s)]. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes: (1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

[Any] Changes or modifications made to this equipment not expressly approved by Endress+Hauser may void the FCC authorization to operate this equipment.

 This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna
- Increase the separation between the equipment and receiver
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected
- Consult the dealer or an experienced radio/TV technician for help

 The installation of the LPR/TLPR device shall be done by trained installers, in strict compliance with the manufacturer's instructions.

- The use of this device is on a "no-interference, no-protection" basis. That is, the user shall accept operations of high-powered radar in the same frequency band which may interfere with or damage this device. However, devices found to interfere with primary licensing operations will be required to be removed at the user's expense.
- Only for usage without the accessory "flooding protection tube", i.e. NOT in the free-field: This device shall be installed and operated in a completely enclosed container to prevent RF emissions, which can otherwise interfere with aeronautical navigation.

Japanese Radio Law and Japanese Telecommunications Business Law Compliance

This device is granted pursuant to the Japanese Radio Law (電波法) and the Japanese Telecommunications Business Law (電気通信事業法). This device should not be modified (otherwise the granted designation number will become invalid).

Certified No.: 202-LSF004

The products are labelled with the Technical Conformity Mark (GITEKI) from Japanese Ministry of Internal Affairs and Communications (MIC) on the name plate.

Ordering information

Detailed ordering information is available from the following sources:

- In the Product Configurator on the Endress+Hauser website: www.endress.com -> Click "Corporate" -> Select your country -> Click "Products" -> Select the product using the filters and search field -> Open product page -> The "Configure" button to the right of the product image opens the Product Configurator.
- From your Endress+Hauser Sales Center: www.addresses.endress.com

**Product Configurator - the tool for individual product configuration**

- Up-to-the-minute configuration data
- Depending on the device: Direct input of measuring point-specific information such as measuring range or operating language
- Automatic verification of exclusion criteria
- Automatic creation of the order code and its breakdown in PDF or Excel output format
- Ability to order directly in the Endress+Hauser Online Shop

Accessories

Device-specific accessories

Weather protection cover

32 Dimensions of weather protection cover, engineering unit: mm (in)

Werkstoff: PVDF

i The weather protection cover can be ordered with the device (product structure, feature 620 "Accessory enclosed", option R1 "weather protection cover").

Alternatively it can be ordered separately as an accessory; order number 52025686.

The sensor is not completely covered in the case of the 40 mm (1.5 in) antenna or the 80 mm (3 in) antenna.

Securing nut G 1-1/2"

33 Dimensions of securing nut, engineering unit: mm (in)

Suitable for use with devices with G 1-1/2" and MNPT 1-1/2" process connection.

Material: PC

Order number: 52014146

Securing nut G 2"

34 Dimensions of securing nut, engineering unit: mm (in)

Suitable for use with devices with G 2" and MNPT 2" process connection on front.

Material: PC

Order number: 52000598

Flooding protection tube 40 mm (1.5 in) antenna, metallized PBT-PC

For use with devices in product structure, feature 100 "Process connection on front", option WFE "Thread ISO228 G1-1/2".

Material: PBT-PC, metallized

i The flooding protection tube can be ordered with the device. Product structure, feature 620 "Accessory enclosed", option R7 "Flooding protection tube, metallized PBT-PC suitable for 40 mm (1.5 in) antenna with G1-1/2" process connection on front".

Alternatively available as an accessory; order number 71325090.

Flooding protection tube 80 mm (3 in) antenna, metallized PBT-PC

A0031094

For use with devices in product structure, feature 100 "Process connection on front", option XRO "Customer mounting device without flange".

Material: PBT-PC, metallized

i The flooding protection tube can be ordered with the device. Product structure, feature 620 "Accessory enclosed", option R8 "Flooding protection tube, metallized PBT-PC suitable for 80 mm (3 in) antenna.

Alternatively available as an accessory; order number 71327051.

Mounting bracket, adjustable

A0028861

35 Dimensions of mounting bracket, engineering unit: mm (in)

Consists of:

- Mounting bracket: 316 (1.4404)
- Angle bracket: 316L (1.4404)
- Screws: A4
- Retaining rings: A4

i The mounting bracket can be ordered with the device (product structure, feature 620 "Accessory enclosed", option R3 "Mounting bracket adjustable, 316L").

Alternatively, it is available as an accessory; order number 71325079.

UNI flanges

Angle bracket for wall mount

37 Dimensions of angle bracket, engineering unit: mm (in)

Process connection	Order No.	Material	Weight
G 1-1/2"	942669-0000	316 Ti (1.4571)	3.4 kg (7.5 lb)
G 2"	942669-0001		
also suitable for MNPT 1-1/2" and MNPT 2"			

Cantilever with pivot

Installation type sensor process connection rear side

A0028885

38 Installation type sensor process connection rear side

- A Installation with cantilever and wall bracket
- B Installation with cantilever and mounting frame
- 1 Cantilever
- 2 Wall bracket
- 3 Mounting frame

Cantilever with pivot, sensor process connection on rear

A0019592

39 Dimensions of cantilever with pivot for sensor process connection on rear, engineering unit: mm (in)

A	B	C	D	Weight	Material	Order No.
585 mm (23 in)	250 mm (9.84 in)	2 mm (0.08 in)	200 mm (7.87 in)	2.1 kg (4.63 lb)	Steel, hot-dip galvanized	919790-0000
				2.0 kg (4.41 lb)	316Ti (1.4571)	919790-0001
1085 mm (42.7 in)	750 mm (29.5 in)	3 mm (0.12 in)	300 mm (11.8 in)	4.5 kg (9.92 lb)	Steel, hot-dip galvanized	919790-0002
				4.3 kg (9.48 lb)	316Ti (1.4571)	919790-0003

- 35 mm (1.38 in) Openings for all G 1" or MNPT 1" connections on rear.
- 22 mm (0.87 in) Opening can be used for an additional sensor.

Retaining screws are included in delivery.

Installation type sensor process connection on front

A0028886

40 Installation type sensor process connection on front

- A Installation with cantilever and wall bracket
- B Installation with cantilever and mounting frame
- 1 Cantilever
- 2 Wall bracket
- 3 Mounting frame

Cantilever with pivot, sensor process connection on front

A0019349

41 Dimensions of cantilever with pivot for sensor process connection on front, engineering unit: mm (in)

A	B	C	D	Weight	Sensor, process connection front side	Material	Order No.
585 mm (23 in)	250 mm (9.84 in)	2 mm (0.08 in)	200 mm (7.87 in)	1.9 kg (4.19 lb)	1-1/2"	Steel, hot-dip galvanized	52014131
						316Ti (1.4571)	52014132
					2"	Steel, hot-dip galvanized	52014135
						316Ti (1.4571)	52014136
1085 mm (42.7 in)	750 mm (29.5 in)	3 mm (0.12 in)	300 mm (11.8 in)	4.4 kg (9.7 lb)	1-1/2"	Steel, hot-dip galvanized	52014133
						316Ti (1.4571)	52014134
					2"	Steel, hot-dip galvanized	52014137
						316Ti (1.4571)	52014138

- 50 mm (2.17 in) or 62 mm (2.44 in) openings for all connections on front G 1-1/2" (MNPT 1-1/2") or G 2" (MNPT 2").
- 22 mm (0.87 in) Opening can be used for an additional sensor.

Retaining screws are included in delivery.

Mounting stand for cantilever with pivot

A0019279

42 Dimensions of mounting frame, engineering unit: mm (in)

Height	Material	Weight	Order No.
700 mm (27.6 in)	Steel, galvanized	3.2 kg (7.06 lb)	919791-0000
700 mm (27.6 in)	316Ti (1.4571)		919791-0001
1400 mm (55.1 in)	Steel, galvanized	4.9 kg (10.08 lb)	919791-0002
1400 mm (55.1 in)	316Ti (1.4571)		919791-0003

RIA15 in the field housing (incl. option for basic configuration FMR20)

A0017722

45 Dimensions of RIA15 in field housing, engineering unit: mm (in)

i The RIA15 remote display can be ordered together with the device. Product structure, feature 620 "Accessory enclosed":

- Option R4 "Remote display RIA15 non-hazardous area, field housing"
- Option R5 "Remote display RIA15 Ex= explosion protection approval, field housing"

i Alternatively available as an accessory, for details see Technical Information TI01043K and Operating Instructions BA01170K.

HART communication resistor

A0020858

46 Dimensions of HART communication resistor, engineering unit: mm (in)

i A communication resistor is required for HART communication. If this is not already present (e.g. in the power supply RMA, RN221N, RNS221, ...), it can be ordered with the device via the product structure, feature 620 "Accessory enclosed": option R6 "HART communication resistor hazardous / non-hazardous area".

i Alternatively available as an accessory, for details see Technical Information TI01043K and Operating Instructions BA01170K.

The HART communication resistor is specially designed for use with the RIA15 and can be attached easily.

1. Disconnect plug-in terminal block.
2. Insert the terminal block into the slot provided on the HART communication resistor module.
3. Insert the HART communication resistor in the slot in the housing.

Communication-specific accessories

Accessories	Description
Commubox FXA195 HART	For intrinsically safe HART communication with FieldCare / DeviceCare via USB interface.  For details, see Technical Information TI00404F
HART Loop Converter HMX50	Is used to evaluate and convert dynamic HART process variables to analog current signals or limit values. Order number: 71063562  For details, see Technical Information TI00429F and Operating Instructions BA00371F
WirelessHART adapter SWA70	Is used for the wireless connection of field devices. The WirelessHART adapter can be easily integrated into field devices and existing infrastructures, offers data protection and transmission safety and can be operated in parallel with other wireless networks.  For details, see Operating Instructions BA00061S
Fieldgate FXA320	Gateway for remote monitoring of field devices with 4 to 20 mA and digital output signal  For details, see Technical Information TI00025S and Operating Instructions BA00053S
Fieldgate FXA520 HART	Gateway for remote monitoring of field devices with HART / 4 to 20 mA and digital output signal  For details, see Technical Information TI00025S and Operating Instructions BA00051S
Field Xpert SFX350	Field Xpert SFX350 is a mobile computer for commissioning and maintenance. It enables efficient device configuration and diagnostics for HART and FOUNDATION Fieldbus devices in non-hazardous areas .  For details, see Operating Instructions BA01202S
Field Xpert SFX370	Field Xpert SFX370 is a mobile computer for commissioning and maintenance. It enables efficient device configuration and diagnostics for HART and FOUNDATION Fieldbus devices in non-hazardous areas and hazardous areas .  For details, see Operating Instructions BA01202S

Service-specific accessories

Accessory	Description
FieldCare / DeviceCare	<p>Endress+Hauser's FDT-based Plant Asset Management tool. Helps to configure and maintain all field devices of your plant. By supplying status information it also supports the diagnosis of the devices.</p> <p> For details refer to Operating Instructions BA00027S and BA00059S.</p>

System components

Accessories	Description
Memograph M graphic display recorder	<p>The Memograph M graphic data manager provides information on all the relevant process variables. Measured values are recorded safely, limit values are monitored and measuring points analyzed. The data are stored in the 256 MB internal memory and also on an SD card or USB stick.</p> <p> For details, see Technical Information TI01180R and Operating Instructions BA01338R</p>
RNS221	<p>Supply unit for powering two 2-wire measuring devices. Bidirectional communication is possible via the HART communication jacks.</p> <p> For details, see Technical Information TI00081R and Operating Instructions KA00110R</p>
RN221N	<p>Active barrier with power supply for safe separation of 4...20 mA current circuits Bi-directional HART-communication is possible using the built-in communication sockets (with resistance R=250 Ω)</p> <p> For details, see Technical Information TI073R and Operating Instructions BA202R</p>
RMA42	<p>Digital process transmitter for monitoring and visualizing analog measured values</p> <p> For details, see Technical Information TI00150R and Operating Instructions BA00287R</p>
RIA452	<p>Digital process meter RIA452, in panel mounted housing for monitoring and displaying analog measured values, batch, pump control functions and can be used as a preset counter and for measuring flow</p> <p> For details, see Technical Information TI113R and Operating Instructions BA00254R</p>
HAW562	<p>Surge arrester for DIN rail according to IEC 60715, used to protect electronic components from being destroyed by overvoltage.</p> <p> For details, see Technical Information TI01012K</p>

Supplementary documentation

The following document types are available in the Download Area of the Endress+Hauser Internet site: www.endress.com → Download:

Standard documentation

Device	Document type	Document code
FMR20	Brief Operating Instructions	KA01248F

Device	Document type	Document code
FMR20	Operating Instructions	BA01578F

Supplementary documentation

Device	Document type	Document code
RIA15	Technical Information	TI01043K
	Operating Instructions	BA01170K

Safety Instructions (XA)

Depending on the approval, the following Safety Instructions (XA) are supplied with the device. They are an integral part of the Operating Instructions.

Feature 010	Approval	Feature 020: "Power Supply; Output"
		A ¹⁾ , P ²⁾
BA	ATEX II 1 G Ex ia IIC T4 Ga	XA01443F
BB	ATEX II 1/2 G Ex ia IIC T4 Ga/Gb	
IA	IEC Ex ia IIC T4 Ga	
IB	IEC Ex ia IIC T4 Ga/Gb	
CB	CSA C/US IS Cl.I Div.1 Gr.A-D, AEx ia / Ex ia T4	XA01445F
GA	EAC Ex ia IIC T4 Ga	XA01578F
GB	EAC Ex ia IIC T4 Ga/Gb	
KA	KC Ex ia IIC T4 Ga	XA01575F ³⁾
KB	KC Ex ia IIC T4 Ga/Gb	
MA	INMETRO Ex ia IIC T4 Ga	XA01576F ³⁾
MB	INMETRO Ex ia IIC T4 Ga/Gb	
NA	NEPSI Ex ia IIC T4 Ga	XA01577F ³⁾
NB	NEPSI Ex ia IIC T4 Ga/Gb	

- 1) 2 wire; 4-20 mA HART configuration
- 2) 2 wire; 4-20 mA HART/Bluetooth® (app) configuration
- 3) At the time of printing in preparation

The nameplate indicates the Safety Instructions (XA) that are relevant to the device.
